THIS WEEK

The median single family home price in LOS ANGELES 90041 this week is \$464,000.

With inventory, days-on-market, and the Market Action Index all recently plateaued, the market isn't sending strong directional signal for the near-term outlook.

PRICE

We continue to see prices in this zip code hovering around these current levels, even though they bumped up a bit this week. Look for a persistent up-shift in the Market Action Index before we see prices move significantly from here.

SUPPLY AND DEMAND

Local conditions are currently quite strongly in the Buyer's Market zone (below 30). The 90-day Market Action Index stands at 18. With several months of inventory available at the current sales rate, buyers should find ample choice.

QUARTILES

Investigate the market in quartiles—where each quartile is 25% of the homes listed.

Most expensive 25% of homes

Upper-middle 25% of homes

Lower-middle 25% of homes

Least expensive 25% of homes

The Market Action Index answers the question "How's the Market?" by measuring the current rate of sale versus the amount of the inventory.

Index above 30 implies Seller's Market conditions. Below 30, conditions favor the buyer.
